Eindhoven, The Netherlands

About Me

Computer Science & Engineering student at TU/e with a focus on human-centred design and intelligent systems. Looking to deepen my work and knowledge at the intersection of technology and human behaviour.

Skills

- **Languages:** Python, Java, C++, MATLAB, Shell
- **Tools:** Git/GitHub, SQL, CI/CD
- **Concepts:** Data Structures & Algorithms, OOP, OS/Networks
- **Methods:** User surveys, usability testing

Languages

- Romanian (native)
- English (C2)
- French (B2)
- Dutch (A1)

Education

- **B.Sc. Computer Science & Engineering**
TU Eindhoven, NL | Sep. 2023 - Nov. 2026
- **Mathematics-Informatics Baccalaureate**
"Tudor Vladimirescu" National College, RO

University Projects

- **Smart Student Dashboard & LLM-Based Socratic Tutor**
TU/e Bachelor End Project Feb. 2026 - June 2026
 - Researched Self-Regulated Learning theory and student dashboard perception to inform UI/UX design for a Python learning platform
 - Designed and integrated an LLM-based Socratic tutor that adapts to the student's cognitive state, balancing intervention timing against learning flow
 - Evaluated design decisions through student surveys and iterative reflection
- **LadyWise - Full-Stack Mobile App (Team Project)**
TU/e Software Engineering Project Sep. 2025 - Jan. 2026
 - **React Native (Expo) | Spring Boot (Java) | MongoDB**
 - Developed both React Native UI and Spring Boot endpoints for questionnaires and cycle tracking.
 - Connected mobile flows to REST APIs + MongoDB; implemented PDF report generation/email and LLM-based risk insight cards.
- **Airport Conveyor Belt Sorting System + Delivery Car**
TU/e - CBL Embedded Systems Apr. 2024 - June 2024
 - **Raspberry Pi | Arduino | C/C++ | sensors | control logic**
 - Scrum-based development with full requirements documentation
- **Pocket Studio — Digital Skills Learning Kit**
TU/e - CBL Engineering for People Apr. 2025 - June 2025
 - **Android-first concept | offline-friendly design | accessibility, community rollout**
 - Co-designed a low-cost digital skills kit for Makers Valley, built around Android phones and limited computer access.
 - Defined entry test + modular lessons and improved onboarding/support via scenario-based testing.

Experience

- **Student Assistant**
TU Eindhoven Aug. 2025 - May 2026
 - Integrated interactive content into Canvas LMS and Sowiso with a focus on seamless student navigation and learning flow
 - Collaborated with course lead and IT staff to resolve platform issues ahead of student-facing deadlines
- **DevOps Intern**
ASML Nov. 2024 - May 2025
 - Observed how interface and workflow design choices directly affect productivity in a high-stakes engineering environment
 - Automated file reorganization with MATLAB scripts, improving maintainability and access.
 - Mapped dependencies across a large codebase and produced clear, versioned team guides.
 - Turned technical findings into slide decks for ~50 engineers.
 - Worked across teams to align on changes and support adoption.
- **Floor Manager (Dutch Design Week)**
4TU Design United Oct. 2025
 - Engaged directly with designers and project owners, deepening interest in the intersection of technology and human experience
 - Supported smooth visitor and exhibitor experience across the exhibition floor
